Application Rate (Tablespoons)	1/2	1	2	3

14-5-5 + MICROS

DIRECTIONS FOR USE
Trees, Shrubs, Ground Cover & Ornamentals: Evenly apply around plant drip line once each year at the rate of 2 to 3 pounds per inch of trunk diameter on bare root plants and 1 to 2 pounds per inch of trunk diameter on balled and burlapped plants. For best results mix into soil and water in after application.

CONTAINER GROWN PLANTS				
Container Size	Inch	Gallon		
	6"	1	2	5
Application Rate (Tablespoons)	1/2	1	2	3

Flowers, Vegetables and Shrubs: Evenly apply around established plants at the rate of 2 to 3 pounds per 100 sq. ft. (10 ft. x 10 ft.). For best results, mix into soil and water in after application.

Fruit Trees, Apple, Pear, Plum and Peach: Apply the above 5-6 lbs. per 100 sq. ft. before and after each harvest. For best results, mix into soil and water in after application.

NOTES:
1 cup equals 16 Tbsp.
1 Tbsp. equals 16 Tsp.
4 Tbsp. equals 1/4 cup.
